

Sergio Mendez

Software Engineer

SUMMARY

Creative, detail-oriented software engineer with a deep interest in all things web. Proven track record of creating and implementing successful front and back-end web applications. Looking to bring my skills to a tech company with global reach.

WORK EXPERIENCE

Software Engineer at 100devs, San Francisco, CA

October 2021 — Present

- Collaborated with a team of developers to build modern and responsive web applications using best practices
- Built semantically structured full-stack web applications
- Applied agile methodologies like SCRUM for project management

Freelance Web-Developer | Berkeley, CA

January 2021 — Present

- Created full stack web applications and static websites for different clients across small and medium size businesses.
- Planned, designed, and developed various features to improve multiple businesses' online presence.

Recent Projects -

Calorie - (Fullstack Web App) - Developed a platform where fitness coaches can communicate and collaborate with clients—data visualization of various fitness metrics like energy expenditure and calorie consumption. Features include authentication, profiles, and friending.

Technology stack (NodeJS, HTML, CSS, TailwindCSS, EJS, MongoDB)

Sunshine Daycare (Gatsby Website) - An online website and onboarding portal for a thriving Bay Area daycare business. Using Gatsby, I delivered a fast and responsive website that was also secure and reliable. I drastically reduced the client's onboarding workload per customer while improving the organization of critical documents.

Technology stack (Gatsby, Javascript, HTML, CSS)
